

# welcome back to triyoga

## what we're doing to help keep you safe...

We're following UK Government guidelines and much more – continuously taking the best advice from around the world and taking actions to keep you safe.

### lower class capacities

We have decreased capacities to allow for appropriate space between each mat. There'll be floor markings and a system to manage the flow of students.

### fewer classes

Our opening schedule has fewer classes to ensure we are able to manage our student numbers and thoroughly clean between classes.

### temperature checks

We will be conducting daily temperature checks of all our staff, teachers, therapists and students. Please don't be offended by us doing this (:

### ppe

Our staff and therapists will all be wearing the recommended PPE. You won't be expected to wear a mask during class, but it's up to you if you wish to do so.

### cleanliness

We will sanitise between every class and deep clean each night with EPA registered products. Hand sanitisers are available at all major touchpoints.

### air flow + uv light

We have fully serviced all our air handling systems and installed new filters. We have also invested in UV light technology for our treatment rooms.

### changing rooms

Changing rooms are open but showers will not be available. Saunas will be accessible, but social distancing and sanitising measures will apply.

### contactless payment

We will be operating a cashless system using only contactless payment. To help reduce crowding at reception pre-booking is required.

### mats + props

We recommend that you bring your own mat and props. The use of triyoga mats and props will be kept to a minimum and they will be sanitised after use.
